PROPOSE

With our discovery and review sessions complete we will prepare, in consultation with our customers, a proposal or proposals based on an accepted concept that will provide sufficient detail to choose and approve a way forward.

CONFIRM

Our team will always take time to confirm all aspects of a chosen design to provide a project delivery plan, based on Prince 2 methodology. The plan will highlight the project components to be executed and those that will require the customers assistance.

DEFINE

Customer agreement of the proposal.

DESIGN

Draft up a high level design, discussion through design workshops, agree a low level design.

INSTALL

Our team will deliver the solution as designed and integrate it into the current infrastructure. As part of the project we will always ensure that all appropriate configuration and testing is complete before putting a solution into service.

SUPPORT

Provide enhanced support, depending on the managed support package purchased, we will monitor, alert and remediate actions.

MANAGE

Implementing a solution is just the start. Cynergy offer managed service packages on an array of solutions, to provide monitoring, alerting and remediation. Our enhanced support ensures that our customers are protected on a 24/7 basis. Our services offer complete peace of mind ensuring that data integrity and security is maintained.

REVIEW

We work closely with our customers to ensure the solution works seamlessly with their existing technology and we are meeting or exceeding the identified goals.

UNDERSTAND

Ensure the solution meets PCI or HIPPA requirements if needed.

ASSESS

Identify the business needs, document the customers requirements.

DISCOVERY

We need to understand the technical landscape of our clients environment and their goals so we provide the right solution for their business needs.
